Sprint Review

Christopher Sulistiyo

Date: Week 11 (13 November– 17 November 2023)

What I've done for this week:

- Made register function work in the API
- Implement sorting function in the front-end for the table
- Tried to make update and delete function in the API
- Tried to configure Azure SQL database to lessen the costing price
- Tried to implement search function in the API

What went well:

-

What could be improved:

- The new docking station made some people who used the desk I share to plug out the mouse, keyboard, and monitor HDMI from the old docking station to the new one, therefore annoys me a little when I need to plug them back to the old docking station that I use

Questions:

Note:

-
